6.1 Numbers to 100,000: practice

← Unit overview · Answers

For you: do one set at a time. There's no clock. You can use a place-value table, a number line, or play money to help. If something feels tricky, skip it and come back later, or ask. At school big numbers are written like 45.302 or 45 302. Here we use a space.

For parents: start with Set 1 even if it looks too easy. Stop after one set. Sets 4 and 5 can wait until week 3.

TD	D	H	T	E

(Copy this table onto paper whenever it helps.)

Set 1 · Warm-up

1. In 352, what is the 5 worth? _____
2. 4 hundreds, 6 tens and 2 ones make: _____
3. Write as a number: two thousand four hundred. _____
4. 1 000 + 300 + 20 + 5 = _____
5. Which number comes after 3 999? _____
6. Which number comes before 5 000? _____
7. 10 more than 2 450 is _____
8. 100 more than 6 720 is _____
9. Which is bigger, 4 089 or 4 098? _____
10. Split 7 384: _____ + _____ + _____ + _____

Set 2 · Warm-up → Building

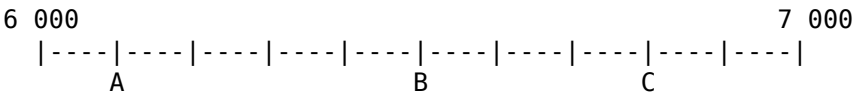

1. In 45 302, what is the 4 worth? _____
2. In 45 302, what is the 3 worth? _____
3. Write as a number: twenty-six thousand five hundred. _____
4. Write as a number: seventy thousand and eighty. _____
5. Write in words: 18 400. _____
6. 30 000 + 4 000 + 600 + 7 = _____
7. 50 000 + 200 + 9 = _____
8. 1 000 more than 23 500 is _____
9. 10 000 more than 67 890 is _____
10. 1 000 less than 40 200 is _____
11. Fill in the number:

TD	D	H	T	E	
8	2	0	5	1	= _____

Set 3 · Building: the number line (*getallenlijn*)

1. Which number is exactly halfway between 0 and 10 000? _____
2. Which number is halfway between 20 000 and 30 000? _____
3. Which number is halfway between 3 400 and 3 500? _____

4. This number line goes from 6 000 to 7 000. Each small step is the same size.

   a. How much is each small step worth? _____
   b. A = _____ B = _____ C = _____

5. Keep counting: 45 000, 46 000, 47 000, _____, _____
6. Count back in hundreds: 12 300, 12 200, _____, _____
7. Count in ten-thousands: 15 000, 25 000, _____, _____
8. Which round number is exactly halfway between 69 990 and 70 010? _____
9. Draw your own line from 0 to 100. Put 25, 50 and 90 on it.

Talk about it: How did you work out the size of each step in question 4? Is there another way?

_____

Set 4 · Building: rounding (*afronden*)

Draw a little number line if it helps: which round number is closer?

1. Round 47 to the nearest 10. _____
2. Round 382 to the nearest 10. _____
3. Round 382 to the nearest 100. _____
4. Round 1 250 to the nearest 100. _____
5. Round 6 480 to the nearest 1 000. _____
6. Round 6 510 to the nearest 1 000. _____
7. Round 23 760 to the nearest 1 000. _____
8. Round 23 760 to the nearest 10 000. _____
9. *Verhaaltjessom:* 18 742 people watch a football match. The newspaper writes “about 19 000 fans”. Did they round to the nearest 10, 100 or 1 000? _____
10. A new bike costs €489. About how much is that, to the nearest €100? _____

Talk about it: When is “about” good enough? When do you need the exact number?

_____

Set 5 · Stretch

1. Put in order, smallest first: 40 500 · 4 050 · 45 000 · 40 050 _____ < _____ < _____ < _____
2. Use the digits 3, 0, 7, 5, 1 once each.
   a. The biggest number you can make: _____
   b. The smallest five-digit number you can make: _____
3. *Verhaaltjessom:* 12 450 cyclists ride in a bike tour on Saturday and 12 540 on Sunday. Which day had more riders, and how many more? _____
4. *Verhaaltjessom:* A town has 63 250 inhabitants. Next year there are 1 000 more. How many inhabitants are there then? _____
5. I have 4 ten-thousands, 13 thousands and 2 tens. What number am I? _____
6. How many hundreds are there in 4 500? _____
7. How many thousands are there in 30 000? _____
8. A whole number rounds to 5 000 when you round it to the nearest 1 000.
   a. What is the smallest it could be? _____
   b. What is the biggest it could be? _____
9. *Verhaaltjessom:* A theme park has 9 500 visitors on Monday and 10 500 on Tuesday. How many visitors is that altogether? _____

10. 99 999 + 1 = _____

Puzzle corner (optional)

Use the digits **1, 2, 3, 4 and 5**, each one once, to make five-digit numbers.

- Can you make a number that rounds to **30 000** (to the nearest 10 000)?
- Can you find another one? And another?
- *Big challenge:* how many can you find altogether? How do you know you've found them all?

There is no hurry. You can come back to this over several days.
