6.2 Times tables: answers

← Unit overview · Practice

For parents: the "How" column shows one strategy. Any correct strategy he explains is just as good, including counting on.

Set 1 · Warm-up

#	Answer	How
1	8	Double 4.
2	60	6 tens.
3	10	Two fives.
4	30	3 tens.
5	16	Double 8.
6	20	Half of 4 × 10 = 40.
7	100	10 tens.
8	9	One group of 9.
9	14	Double 7.
10	30	Half of 6 × 10 = 60.
11	30	3 tens.

Set 2 · Doubling

#	Answer	How
1	24	Double 12.
2	48	Double 24.
3	28 and 56	Double 14 = 28; double 28 = 56.
4	36	Double 18.
5	40	Double 20.
6	32	Double 16.
7	24	2 × 3 = 6, 4 × 3 = 12, 8 × 3 = 24.
8	64	2 × 8 = 16, 4 × 8 = 32, 8 × 8 = 64.
9	16	2 × 4 = 8, double = 16.
10	10	Two fives.

Set 3 · ×10, ×5 and ×9

#	Answer	How
1	70, 35	Half of 70.
2	80, 40	Half of 80.
3	60, 54	60 − 6.
4	70, 63	70 − 7.

#	Answer	How
5	72	80 − 8.
6	81	90 − 9.
7	45	Half of 90.
8	30	Turn around: 5 × 6 = half of 60.
9	36	40 − 4.
10	90	9 tens.

Talk about it: the digits of every answer in the 9 table (up to 10 × 9) add up to 9: 5 + 4, 6 + 3, 7 + 2, 8 + 1 (and 9 + 0 for 90). It's a handy way to check.

Set 4 · Using a fact you know

#	Answer	How
1	21	14 + 7.
2	42	35 + 7.
3	49	42 + 7.
4	48	40 + 8.
5	56	40 + 16.
6	24	16 + 8, or turn around: 8 × 3.
7	36	5 × 6 = 30, plus 6.
8	42	Same as 6 × 7.
9	54	10 × 6 = 60, minus 6 (turn around: 9 × 6).
10	18	2 × 6 = 12, plus 6.
11	21	Same as 3 × 7 (question 1).

Talk about it, ways to get 7 × 8: 5 × 8 + 2 × 8 = 40 + 16; 7 × 7 + 7 = 49 + 7; double 4 × 7 = double 28; 10 × 8 − 3 × 8 = 80 − 24. All give 56.

Set 5 · Dividing and word problems

#	Answer	How
1	4	6 × 4 = 24.
2	8	7 × 8 = 56.
3	7	6 × 7 = 42.
4	8	9 × 8 = 72.
5	9	7 × 9 = 63.
6	7	7 × 7 = 49.
7	42 eggs	7 × 6 = 42.
8	€36	4 × 9 = 40 − 4.
9	8 stickers	48 : 6 = 8, because 6 × 8 = 48.
10	7 × 7, by 1	7 × 7 = 49 and 6 × 8 = 48.

#	Answer	How
11	25	Half of 50.

Puzzle corner

- **Answers that appear 4 times:** 6, 8, 10, 12, 18, 20, 24, 30 and 40. (For example 24 = 3 × 8 = 8 × 3 = 4 × 6 = 6 × 4.)
- **Answers that appear only once:** 1, 25, 49, 64, 81 and 100. They are all square numbers (*kwadraten*) that can't be made another way inside the grid.
- **Big challenge:** there are **42** different answers in the grid. A good way to check is to list every answer in order and tick it off. Finding the number exactly is hard; a careful, organised attempt is the real success here.
