6.2 Times tables: practice

← Unit overview · Answers

For you: there's no clock here, ever. Take as long as you like. Use any strategy. You can write down your thinking, use your fingers, or draw dots. Every answer you *work out* counts just as much as one you just *know*.

For parents: please don't time these. If he gets stuck, ask "What do you know that's close?" Set 1 is meant to feel easy.
