6.3 Adding and subtracting: practice

← Unit overview · Answers

For you: work on squared paper so the digits line up. Use the method you use at school. Estimating first is like a safety net. It helps you spot if something went wrong. No clock, no rush.

For parents: Sets 1–4 use mental strategies and *kolomsgewijs*. Only start Set 5 when school has taught *cijferend*.

Set 1 · Warm-up: in your head

1. 40 + 30 = ____
2. 200 + 500 = ____
3. 65 + 10 = ____
4. 90 − 40 = ____
5. 800 − 300 = ____
6. 136 + 100 = ____
7. 47 + 3 = ____
8. 100 − 25 = ____
9. 350 + 50 = ____
10. 1 000 − 1 = ____
11. 60 + 20 = ____

Set 2 · Building: estimating (*schatten*)

Round to the nearest hundred (or thousand) and estimate. You don't need the exact answer. If you want to, you can work it out afterwards and see how close you were.

1. 487 + 235 ≈ _____ + _____ = _____
2. 312 + 489 ≈ _____
3. 698 + 205 ≈ _____
4. 832 − 417 ≈ _____
5. 2 950 + 1 980 ≈ _____
6. 5 012 − 1 989 ≈ _____
7. Which is the best estimate for 396 + 411? Circle it: **700 · 800 · 900**
8. *Verhaaltjessom:* New football boots cost €48 and a jacket costs €79. About how much do they cost together? _____

   Talk about it: In question 3, both numbers were close to a round number. Did that make it easier?

Set 3 · Building: adding column by column (*kolomsgewijs*)

Estimate first, then work it out.

```
Example:   356
           231 +
          ----
           500
            80
             7
          ---- +
```

```
  587
```

1. 243 + 125 = _____
2. 356 + 231 = _____
3. 487 + 235 = _____
4. 364 + 458 = _____
5. 1 246 + 2 375 = _____
6. 2 508 + 1 694 = _____
7. 4 125 + 3 050 = _____
8. *Verhaaltjessom:* On a bike holiday you ride 46 km on the first day and 38 km on the second day. How far is that altogether? _____
9. *Verhaaltjessom:* A train has 268 passengers in the front part and 345 in the back part. How many passengers are on the train? _____
10. 300 + 400 = _____

Set 4 · Building: subtracting column by column

Estimate first. Use the way you subtract at school.

```
Example:   432
           263 −
          ----
           200
           −30
            −1
          ----
           169
```

1. 586 − 243 = _____
2. 768 − 325 = _____
3. 432 − 263 = _____
4. 725 − 348 = _____
5. 1 254 − 732 = _____
6. 6 000 − 2 450 = _____
7. *Verhaaltjessom:* You've saved €325. The bike you want costs €489. How much more do you need to save? _____
8. *Verhaaltjessom:* A car trip to the coast is 214 km. You've already driven 128 km. How far is it still? _____
9. 900 − 500 = _____

Talk about it: How can you check a subtraction answer using adding?

Set 5 · Stretch: the written way (*cijferend*) with exchanging (*inwisselen*)

Write the numbers under each other, ones under ones. Start on the right.

1. 487 + 235 = _____
2. 2 856 + 1 467 = _____
3. 3 049 + 2 978 = _____
4. 432 − 263 = _____
5. 1 705 − 346 = _____
6. 5 002 − 1 368 = _____
7. *Verhaaltjessom:* A supermarket has 1 250 bottles of water. On a hot day it sells 487 bottles. How many are left? _____

8. *Spot the mistake:* Sam says 803 − 278 = 675. Estimate. Is Sam right? If not, what is the right answer? _____
9. *Verhaaltjessom:* An intercity train has 1 135 seats. 862 seats are taken. How many seats are free? _____
10. 250 + 250 = _____

Puzzle corner (optional)

Use the digits **1, 2, 3, 4, 5, 6**, each one once, to make two three-digit numbers.

```
  [ ][ ][ ]
+ [ ][ ][ ]
```

- Make a sum. Now make a bigger one.
- What's the **biggest** sum you can make?
- How **close to 1 000** can you get?
- *Big challenge:* now subtract instead. What's the **smallest** difference you can make?
