6.6 First decimals: answers

← Unit overview · Practice

For parents: answers use the Dutch decimal comma, as on the practice sheet. 0,5 and 0,50 are the same number, so accept either.

Set 1 · Warm-up

#	Answer	How
1	100	100 cents in a euro.
2	€0,50	Half a euro.
3	50	The “,50” is 50 cents.
4	100	100 cm in a metre.
5	50	Half of 100.
6	10	10 × 10 cents = 100 cents.
7	€1,50	€1 and 50 cents is more than €1 and 5 cents.
8	125	100 cm + 25 cm.
9	€7,50	€7 and 50 cents.
10	€0,10	One tenth of a euro.

Set 2 · Tenths

#	Answer	How
1	0,6	6 of the 10 parts are shaded.
2	0,3	
3	0,7	7 tenths.
4	5 (5/10)	0,5 is 5 tenths, which is also a half.
5	1,4	
6	2 wholes and 6 tenths	
7	1	10 tenths make a whole.
8	0,7	3 tenths + 4 tenths.
9	2	5 tenths + 5 tenths make another whole.
10	0,4	2 tenths + 2 tenths.

Set 3 · Hundredths, money and measuring

#	Answer	How
1	0,25	Like 25 cents.
2	35	
3	45	
4	2,08	8 cm is 8 hundredths of a metre, so 0 tenths and 8 hundredths.

#	Answer	How
5	75	
6	320	3 m = 300 cm, plus 20 cm.
7	3 tenths (0,3) and 7 hundredths (0,07)	Like €4,37: 3 ten-cent coins and 7 one-cent coins.
8	5 cents	The 0 means no ten-cent coins.
9	50	Half a metre.
10	€1 (€1,00)	Two halves of a euro.

Set 4 · Number line and comparing

#	Answer	How
1	A = 0,2, B = 0,5, C = 0,9	The line is split into 10 steps of 0,1.
2	D = 2,3, E = 2,7	Same, starting from 2.
3	0,5	0,50 vs 0,45: 50 cents is more than 45 cents.
4	1,2	1,20 vs 1,19.
5	0,8	80 cents vs 8 cents.
6	3,5	3,50 vs 3,05.
7	0,07 < 0,25 < 0,3 < 0,7	Write them all with two decimals: 0,07, 0,25, 0,30, 0,70.
8	0,45	Halfway between 40 cents and 50 cents.
9	= (the same)	0,70 is 7 tenths and 0 hundredths.

Talk about it: think of 0,5 as €0,50 and 0,45 as €0,45. Which would you rather have?

Set 5 · Stretch

#	Answer	How
1	Daan, by 5 cm	2,90 m − 2,85 m = 0,05 m = 5 cm.
2	€3,64	€2,49 + €1,15: 3 euros + 64 cents.
3	€1,36	Count up from €3,64: +€0,36 makes €4, +€1 makes €5.
4	7 km	3,5 + 3,5 = 7.
5	250 g	1 kg = 1 000 g, and 0,250 kg is 250 thousandths of a kilogram.
6	1,5 kg	1,50 vs 1,25.
7	0,13	0,130 vs 0,125. Fill in zeros so both have three decimals.
8	€5	10 × 50 cents = 500 cents.
9	€5	79 cents is more than half a euro, so round up.

#	Answer	How
10	1	Two halves.

Puzzle corner

12 numbers. The comma can go after the first digit (six numbers) or after the second digit (six numbers). In order:

1,23 < 1,32 < 2,13 < 2,31 < 3,12 < 3,21 < 12,3 < 13,2 < 21,3 < 23,1 < 31,2 < 32,1

Smallest: **1,23**. Biggest: **32,1**. A neat observation: every number with the comma after two digits is bigger than every number with the comma after one digit.
