7.4 Practice: decimals (*kommagetallen*)

← Unit 7.4 · Answers

Money helps with almost every question here: € 0,25 is 25 cents. You can also use a ruler or tape measure as a number line.

Set 1 · Warm-up: money and tenths

1. € 1,50 + € 1,50 =
2. How many 10-cent coins make € 1?
3. 0,5 is how many tenths?
4. Write 3 tenths as a kommagetal.
5. Write 7 hundredths as a kommagetal.
6. Write “2 wholes and 45 hundredths” as a kommagetal.
7. Which is more: 0,5 or 0,45?
8. Which is more: 0,3 or 0,25?
9. What number is halfway between 1 and 2?
10. 0,5 + 0,5 =

Talk about it: For question 8, how did you decide? Could you explain it to a friend using money?

Set 2 · Building: putting in order and rounding

1. Put in order, smallest first: 0,4 · 0,35 · 0,5 · 0,05
2. Put in order, smallest first: 2,1 · 2,09 · 2,15 · 2,01
3. Which is bigger: 3,7 or 3,698?
4. Write a number that is between 4,5 and 4,6.
5. In the long jump, Noor jumped 3,08 m, Finn 3,8 m and Mila 3,48 m.
   a. Who jumped furthest?
   b. Put the jumps in order from shortest to longest.
6. Round 4,67 to a whole number.
7. Round 12,349 to one decimal place.
8. Round 0,875 to two decimal places.
9. Which is bigger: 1,0 or 0,9?

Talk about it: In question 3, 3,698 has more digits. Why isn’t it bigger?

Set 3 · Building: adding and subtracting

1. 0,3 + 0,4 =
2. 1,25 + 0,5 =
3. 3 − 0,4 =
4. 5,6 + 2,75 =
5. 10 − 6,25 =
6. 7,05 − 2,8 =
7. 0,9 + 0,15 =
8. On Saturday you cycle 12,5 km in the morning and 8,75 km in the afternoon. How far is that altogether?
9. At the drugstore you buy shampoo for € 4,79 and toothpaste for € 2,35. You pay with € 10. How much change do you get?

10. 2,5 + 2,5 =

Talk about it: For question 3, how did you take 0,4 away from a whole number?

Set 4 · Building: × and : by 10, 100 and 1000

1. 2,5 × 10 =
2. 0,7 × 10 =
3. 3,45 × 100 =
4. 0,06 × 100 =
5. 1,2 × 1 000 =
6. 45 : 10 =
7. 6 : 100 =
8. 320 : 1 000 =
9. 7,5 : 10 =
10. One pencil costs € 0,35. What do 100 pencils cost?
11. Ten friends share € 12,50 equally. How much does each friend get?
12. 0,1 × 10 =

Talk about it: Look at question 1. Why is "just add a zero" a bad rule for kommagetallen?

Set 5 · Stretch: rounding money and word problems

Round to whole euros (*hele euro's*):

1. € 3,47
2. € 12,50

You pay cash. The shop rounds the total to 5 cents (*afronden op 5 cent*). What do you pay?

3. € 3,47
4. € 3,48
5. € 7,92
6. € 0,99

Word problems:

7. Your shopping costs € 2,95, € 4,10 and € 0,99.
   a. Estimate the total by rounding each price to whole euros.
   b. Now work out the exact total.
8. 1 kg of cheese costs € 12,80. What does 100 g cost?
9. A 1,5 litre bottle of lemonade is poured into glasses of 0,25 litre. How many glasses can you fill?
10. € 0,50 + € 0,50 =

Talk about it: Is the cash rule fair? Does the shop or the customer gain more, or does it even out?

Puzzle corner (optional)

Make 1. Find three *different* kommagetallen with one digit after the comma (like 0,2 or 0,7) that add up to exactly 1. For example, is 0,1 + 0,2 + 0,7 allowed?

- Find another way.

- How many different ways can you find? (0,1 + 0,2 + 0,7 and 0,7 + 0,2 + 0,1 count as the same.)
- How do you know when you've found them all?
