8.6 Practice: test-style mixed sets

← Unit overview · Answers

These four sets look like doorstroomtoets questions: different topics mixed together, some open questions and some multiple choice. Each question has a small label for its domain:

- **[G]** *Getallen* (numbers)
- **[V]** *Verhoudingen* (ratios, percentages, fractions)
- **[M]** *Meten en Meetkunde* (measuring and geometry)
- **[Vb]** *Verbanden* (tables, graphs, rules)

There is no clock. Take your time. Use your toolkit: breathe, read twice, skip and come back, draw it, estimate to check. Scrap paper is always allowed.

Sets 1 and 2 are at the fundamental level (1F). Sets 3 and 4 reach towards the target level (1S). If Sets 3 and 4 feel hard, that's normal: they're a stretch.

Set 1 (1F)

1. **[G]** 345 + 278 = …
2. **[G]** 1 000 − 457 = …
3. **[G]** 24 × 15 = …
4. **[M]** 2,5 m = … cm
5. **[V]** Juice boxes are sold in packs of 6. You buy 3 packs. How many juice boxes do you have?
6. **[G]** 864 : 8 = …
7. **[Vb]** Groep 8 voted for their favourite fruit.

   ```
   appel        ■■■■■■■■
   banaan       ■■■■■
   peer         ■■■
   sinaasappel  ■■■■■■
   (■ = 1 child)
   ```

   How many children chose *banaan*?
8. **[V]** How much is 10% of €45?
9. **[M]** How many degrees is a right angle (*rechte hoek*)? A. 45° B. 90° C. 180° D. 360°
10. **[G]** Which number is the biggest? A. 0,75 B. 0,09 C. 0,8 D. 0,079

Set 2 (1F)

1. **[G]** 3,5 + 2,75 = …
2. **[V]** How much is ¼ of 60?
3. **[M]** 1 250 g = … kg
4. **[M]** A film starts at 19:45 and ends at 21:20. How long is the film?
5. **[M]** A garden is a rectangle of 6 m by 4 m. What is its area (*oppervlakte*)? What is its perimeter (*omtrek*)?

6. **[Vb]** The temperature at noon this week:

Day	ma	di	wo	do	vr
°C	12	15	9	14	10

   a. On which day was it warmest?
   b. How many degrees difference between the warmest and the coldest day?
   c. What was the average temperature?

7. **[Vb]** A bus leaves the stop at 8:12, 8:27 and 8:42. It keeps going like this. When does the next bus after 8:42 leave?

8. **[G]** Round 2 486 to the nearest hundred.

9. **[M]** 1,5 l = … ml

10. **[Vb]** Look at the fruit chart in Set 1, question 7. How many children voted altogether? How many more chose *appel* than *peer*?

Set 3 (1F → 1S)

1. **[V]** Write 3/5 as a percentage.
2. **[V]** Which fraction is the same as 0,125? A. 1/125 B. 1/8 C. 1/4 D. 12/5
3. **[V]** A pair of trainers costs €64. There is 25% korting. What is the new price?
4. **[M]** On a map with scale 1 : 50 000, two churches are 3 cm apart. How far apart are they in real life, in km?
5. **[V]** A train travels 90 km in 1,5 hours. What is its average speed in km/u?
6. **[G]** 2/3 + 1/6 = …
7. **[G]** 7,2 : 0,9 = …
8. **[V]** Rice: a 750 g bag costs €3,00 and a 1 kg bag costs €3,80. Which is cheaper per kilo?
9. **[M]** An aquarium is 60 cm long, 30 cm wide and 40 cm high. How many litres of water does it hold when full?
10. **[V]** A bike repair costs €50 *excl. btw*. Btw is 21%. What do you pay *incl. btw*?

Set 4 (1S stretch, finishing on a win)

1. **[V]** A family cinema ticket used to cost €40. Now it costs €50. By what percentage did the price go up?

2. **[G]** Put in order, smallest first: 2/3 · 0,6 · 65%

3. **[V]** A recipe for 4 people uses 200 g rice. How much rice for 10 people?

4. **[M]** A triangle has angles of 35° and 75°. How big is the third angle?

5. **[Vb]** Five test scores: 6, 8, 7, 9, 10. What is the average?

6. **[G]** 4,5 × 1 000 = …

7. **[Vb]** The table shows how far Yara has cycled.

Time (minutes)	0	15	30	45
Distance (km)	0	5	10	15

   a. What is her speed in km/u?
   b. If she keeps going at the same speed, how far will she have cycled after 1 hour?

8. **[Vb]** A taxi costs €4 to start plus €2 per km. What does a 7 km ride cost?
9. **[M]** 1 m³ = … litres
10. **[V]** How much is 50% of 100?

Talk about it (after any set): Which question did you star as hard? Was it as hard as it looked? Which part of your toolkit helped most?

Puzzle corner (optional, just for fun)

1. Make up your own test question for each of the four domains. Give them to your parent to solve.
2. A multiple-choice question has four answers. You know for sure that two of them are wrong. What fraction of the time would a guess between the other two be right?
3. Which is more: 3/4 of an hour or 40% of two hours?

When you've finished a set, look back at the questions you starred. Were they as hard as they looked? Then put a tick on your progress tracker. Well done for sticking with it.
